

Enterasys Dragon[®] Intrusion Defense

An enterprise-wide solution to detect and prevent security threats

Customer Benefits

- Experienced professionals will work with IT staff to develop achievable goals to immediately solidify corporate security stature
- Implementation planning by uniquely qualified experts experienced in the design and deployment of Dragon security solutions
- Efficient installation of new products with minimal disruption to IT and business operations
- Hands-on product implementation by a certified professional to provide the knowledge needed to understand the solution and its functionality, as well as customer support contact methods
- Integrated network- and host-based intrusion detection and scalable enterprise management for the most integrated solution available
- Award-winning network-based detection via Dragon Network Sensor
- Advanced policy management and centralized management monitoring, analysis and reporting via Dragon Enterprise Management Server

Dragon Intrusion Defense provides protection for the enterprise IT infrastructure by detecting and mitigating network-borne threats, securing critical data center access and helping to enforce regulatory compliance.

Enterasys Professional Services and our certified partners are security subject matter experts with targeted strengths in the design and deployment of Secure Networks.™ We will work directly with your network specialists and security personnel to plan, design, implement and operate your network using Enterasys Dragon Intrusion Defense.

End-to-End Solutions and Expertise

We deliver service in a phased approach that begins with an assessment of the current environment—people, process, business and network issues—and moves through the phases of designing, implementing, migrating and managing a customized network to meet your unique requirements.

Scope of Service

- Meet with enterprise network and security staff to define overall deployment goals
- Collect current enterprise network map to guide NIDS and HIDS design and implementation
- Collaborate with enterprise security staff to determine installation locations for Dragon NIDS, HIDS and IPS devices
- Agree on the final installation and deployment verification checks to validate the fully operational Dragon Intrusion Defense system.
- Determine installation and full deployment milestone dates
- Implement the agreed upon design, including Dragon Enterprise Management Server, NIDS, HIDS, and EMS client software installation
- Provide configuration and operational training on the Dragon Intrusion Defense system to security staff
- Perform final installation and deployment verification checks
- Provide Dragon Intrusion Defense tuning guidance
